Cloud Storage Cost Calculator
Calculator: cloud-storage-cost-calculator | Engine version: 1
Raw engine values: full numeric precision; no display rounding or sampled rows.
Units appear only where supplied by the calculation or bound display metadata.
Embedded Unicode glyphs are readable.
Unsupported characters and controls use explicit Unicode escapes.
Tagged PDF; PDF/UA conformance: UNVERIFIED.
Text follows document order; charts include complete numeric text alternatives.

INPUTS
Storage (GB) [GB]
input["storageGb"] = 1000
Price per GB-month
input["pricePerGbMonth"] = 0.02

RESULTS
Monthly storage cost [currency units]
output["value"] = 20
output["steps"][0] = "Cloud Storage Cost = 20"

METHODOLOGY
Deterministic calculation using the reviewed Technology & Computing engine.\u000aTechnical calculation revision: technology.cloud-storage-cost@1\u000a\u000aProvider-neutral monthly storage estimate using a user-supplied unit price.\u000aMonthly cost = storage GB × price per GB-month

DECLARED FORMULAS
cloud-storage-cost-calculator: Monthly cost = storage GB × price per GB-month
Provider-neutral monthly storage estimate using a user-supplied unit price.

SOURCES
NIST SP 1181 — Unit Pricing Guide
https://www.nist.gov/publications/nist-sp-1181-unit-pricing-guide-best-practice-approach-unit-pricing-2025-ed
NIST documents unit pricing as expressing price relative to a unit quantity. These provider-neutral estimators multiply a user-supplied quantity by a user-supplied unit price; provider tiers and allowances remain outside the calculation.
